

ANNEX A

NARS ROADMAP

The NARS Roadmap provides the short-term, medium-term, and long-term goals of the NARS. This roadmap is for the period beginning 2023.

Duration	Functionality
Short-term (Present and within 1 year)	Use of asset data and analysis to help in the formulation of public policy interventions and plans that will steer asset management decisions, such as the PGAMP, NAMP, and AAMPs.
	Visualization of government asset portfolio
	Portfolio and risk analysis such as asset exposure and hazard concentration assessments and event risk modeling
Medium-term (1-3 years)	Web-based access to the NARS data by other agencies
	Analytics for agency-specific portfolio
	Collection of data on asset condition and performance.
	Preparation and dissemination of annual asset management and portfolio risk report
Long-term (>3 years)	Collection of asset data and generation of pertinent analytics that will inform government decisions on asset and risk management and financing
	Criticality analysis
